Important remarks:

- Mixing directions can change depending on the price and quality of local available raw materials.
- To achieve good results, follow up on the mixing instructions! Do not alter or change without consult.
- When oil is available; replace 0,5% maize for 0,5% oil.

- Limestone is a raw material where the calcium content can vary enormously. Calculations have been made with a calcium content of 33%. When using another concentration of calcium in lime stone, it is recommended to correct for this.

- Always make sure all birds have access to enough feed.
- To avoid drop in feed intake; ensure the change of feeds (from Prelayer to Prepeak feed etc.) happens gradually.
- Make sure birds always have access to fresh, cool and clean water.
- Be biosecurity wise; use disinfection materials, keep separate shoes for the bird houses only.
- In case of management related issues, ask for the Koudijs Management Guide.
- In case rice bran is available, 1 kg maize bran can be replaced with 700 gram rice bran and 300 gram maize
