Economical Mixings aim for the most economical feeds for your pigs

Important remarks:

- To achieve good results, follow up on the mixing instructions! Do not alter or change without consult.
- Raw materials that are ground too coarsely have a negative effect on the results (target average particle size < 1.0 mm.)
- For young piglets it is recommended to use maize flour (target average particle size < 0.7 mm.)
- Maize bran is sensitive to mold, therefore dry preservation is very important (target moisture content < 13%)
- For extra stimulus of intake and digestion use Romelko Creep Feed
- To help piglets to survive at a young age use Nurse Meal
